Pruning

General Parameters for Pruning

Pruning function: MagPruning

SELECT

Maximum error increase in %: 10

Accepted error: 5

Recreate last pruned element ? YES NO

General Parameters for Training

Learning function: Std_Backpropagation

SELECT

Learn cycles for first training: 1000

Learn cycles for retraining: 100

Minimum error to stop: 1

Parameters for OBS

Initial value for matrix: 1e-06

Parameters for Node Pruning

Input Pruning ? YES NO

Hidden Pruning ? YES NO
