The SFI tech. report that constitutes the full version of the paper "Bayesian back-propagation over i-o functions rather than weights" is not being stored in neuroprose. It can instead be found, compressed and/or compressed/uuencoded, under anonymous ftp at ftp.santafe.edu; once you've logged in to the ftp site, get to the appropriate directory by typing 'cd pub/Users/dhw/Stored_-stuff'. The files in question all have the prefix 'nips.93'.
