**6884/02**

Paper 2 Core

**October/November 2012**

**1 hour 15 minutes**

Candidates answer on the Question Paper.

No additional materials are required.

**READ THESE INSTRUCTIONS FIRST**

Write your Centre number, candidate number and name on all the work you hand in.  
Write in dark blue or black pen.

You may use a soft pencil for any diagrams, graphs or rough working.  
Do not use staples, paper clips, highlighters, glue or correction fluid.

Answer **all** questions.

Write your answers in the spaces provided on the question paper.

You may use a calculator.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [ ] at the end of each question or part question.

<b>For Examiner's Use</b>

8	
<b>Total</b>	

This document consists of **12** printed pages.

- 1 (a) Fig. 1.1 shows the changes in the quantities of various constituents of a person's diet as they pass through the digestive system.

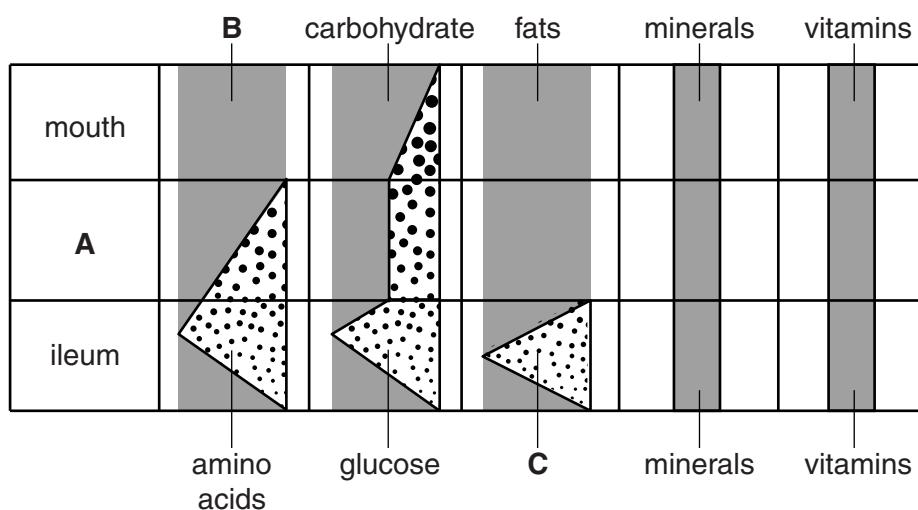

Fig. 1.1

- (i) Name structure A.

..... [1]

- (ii) Name nutrients B and C.

B .....

C .....

- (iii) Describe and explain the changes that occur in carbohydrates in the mouth.

.....  
.....  
.....  
.....  
.....  
.....  
.....  
..... [3]

- (iv) Explain why there is no change in the width of the bars representing minerals and vitamins.

.....  
.....  
.....  
..... [2]

- (b) Explain what happens to the amino acids in the small intestines.

.....  
.....  
.....  
.....  
.....  
.....  
.....

[2]

**[Total: 10]**

- 2 Fig. 2.1 shows a longitudinal section through a kidney.

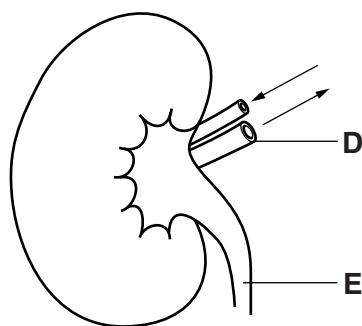

Fig. 2.1

- (a) Name parts **D** and **E** in Fig. 2.1.

**D** .....

**E** ..... [2]

- (b) State two functions of the kidney.

1 .....

.....

2 .....

..... [2]

- (c) State two differences in the composition of the blood entering and leaving the kidney.

1 .....

.....

2 .....

..... [2]

- (d) Describe the role of the liver in

- (i) the formation of urea,

.....  
..... [2]

- (ii) the breakdown of alcohol.

.....  
..... [1]

[Total: 9]

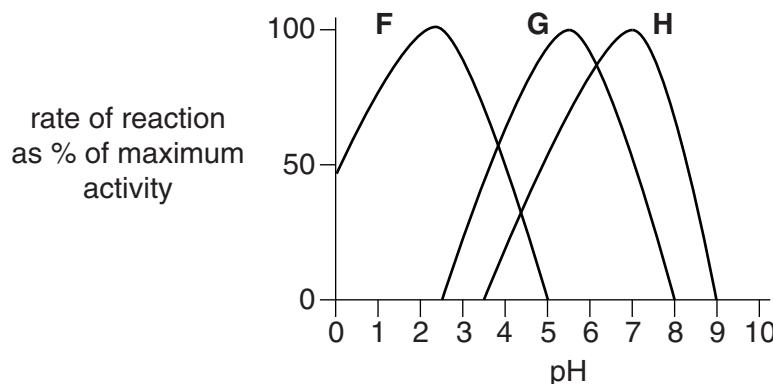

- 3 (a) Explain the term *enzyme*.

.....  
.....

[2]

Fig. 3.1 shows the effect of pH on the reaction rate of three enzymes F, G and H.

Study Fig. 3.1 and answer the questions that follow.

**Fig. 3.1**

- (b) (i) State the optimum (best) pH for enzyme G.

.....

[1]

- (ii) Identify enzymes F and H

enzyme F .....

enzyme H ..... [2]

- (c) Peeled apples turn brown when they are exposed to air. Enzymes cause this browning.

State two ways by which this enzyme activity could be slowed down.

1.....

.....

2.....

.....

[2]

**[Total: 7]**

- 4 Fig. 4.1 shows the direction of water movement through a root.

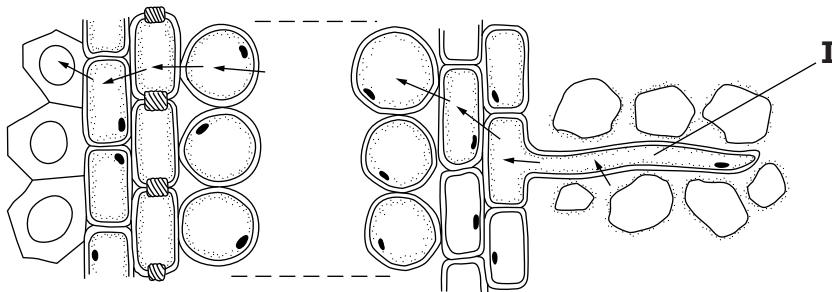

Fig. 4.1

- (a) (i) Describe how cell I is adapted for the absorption of water and mineral salts.

.....  
.....  
.....

[3]

- (ii) Describe the movement of water from the soil to cell I.

.....  
.....  
.....

[3]

- (b) Fig. 4.2 shows the relationship between the rate of transpiration in a plant and the speed of air movement over its leaves.

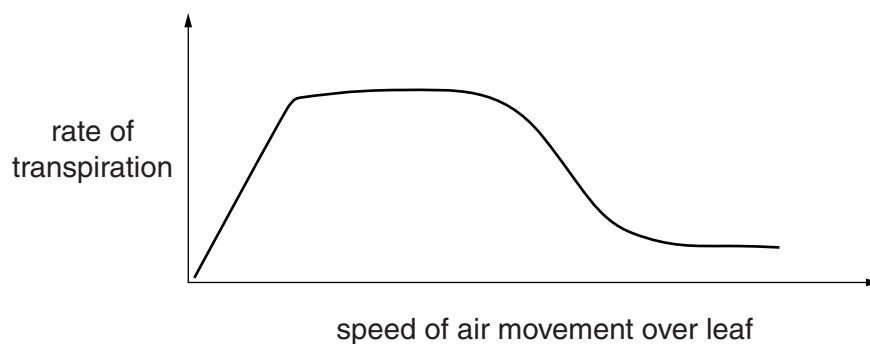

Fig. 4.2

- (i) Describe the relationship between the speed of air movement over leaves and the rate of transpiration shown in Fig. 4.2.

.....  
.....  
.....  
.....  
.....  
.....  
.....

[4]

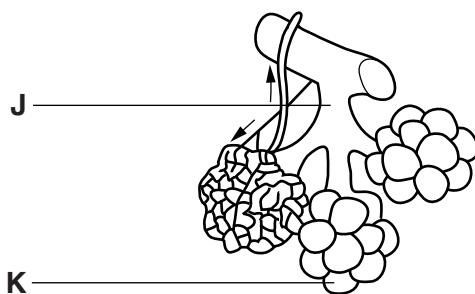

- (ii) Name one other condition that affects the rate of transpiration.

.....

[1]

**[Total: 11]**

- 5 Fig. 5.1 shows part of a respiratory system.

**Fig. 5.1**

- (a) Name the parts labelled **J** and **K**.

**J**.....

**K**..... [2]

- (b) Describe two features of structure **K** that make it efficient for gaseous exchange.

1 .....

.....

2 .....

..... [2]

- (c) Name two major toxic substances found in tobacco.

1.....

2..... [2]

- (d) The short-term effects of smoking are that the air passages constrict and the cilia lining the air passages stop beating.

Describe the effects of the constriction of bronchioles and non-beating of cilia on the respiratory system.

*constriction of bronchioles*

.....

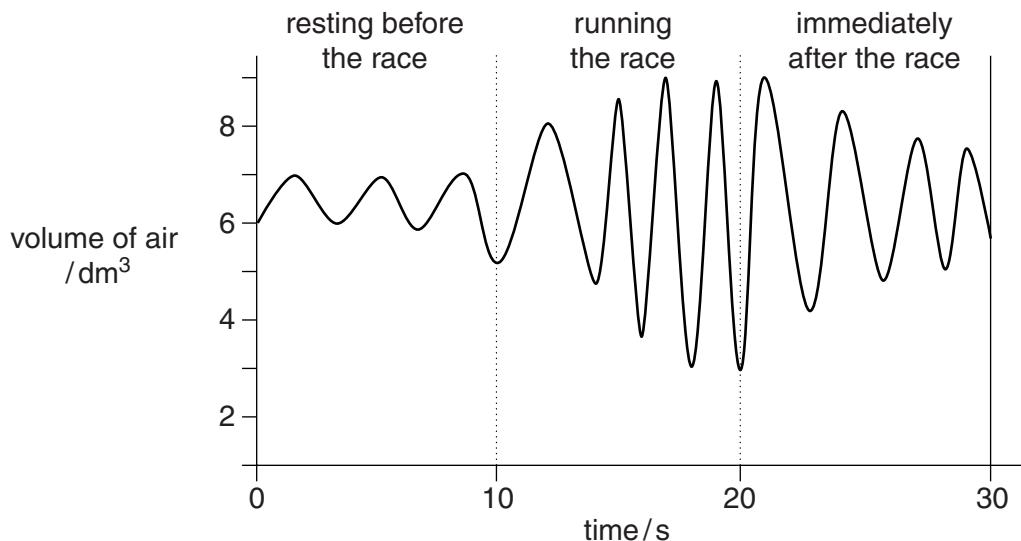

..... [1]

*non-beating of cilia*

.....

..... [2]

- (e) Fig. 5.2 shows the volume of air inhaled and exhaled by a runner.

**Fig. 5.2**

- (i) State the volume of air inhaled by the runner in each breath before the race.

..... [1]

- (ii) State the number of breaths the runner takes per minute before the race.

..... [2]

- (iii) Calculate the volume of air inhaled in the deepest breath taken by the runner in the race.

volume ..... [1]

- (iv) Describe the changes shown in Fig. 5.2 in the volume and rate of breathing before and after the race.

.....

.....

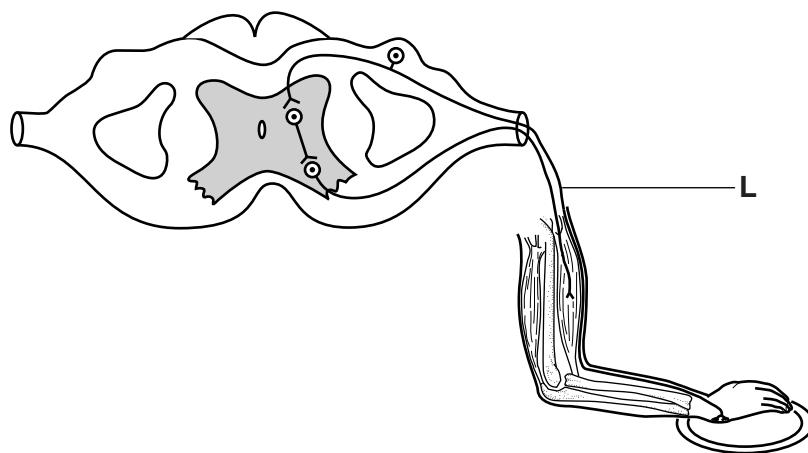

..... [2]

- (v) Name the hormone that is secreted in the body of the runner a few minutes before the gun is fired to start the race.

..... [1]

**[Total: 16]**

- 6 Fig. 6.1 shows a reflex arc of a hand touching a hot stove.

**Fig. 6.1**

- (a) Name the nerve cell L.

..... [1]

- (b) The hand is quickly lifted up from the hot stove.

- (i) Describe what happens to the muscles of the arm to enable the hand to be lifted up from the hot stove.

.....  
.....  
.....

..... [4]

- (ii) Name two bones that move when the arm is bent at the elbow.

1 .....

2 .....

[2]

- (c) Name two other stimuli to which the hand may respond.

1 .....

2 .....

[2]

**[Total: 9]**

- 7 (a) A girl has a menstrual cycle of 28 days. She had her first day of menstruation on the 9th of January.

(i) State the date on which she is likely to ovulate.

..... [1]

(ii) State the role of progesterone in the menstrual cycle.

.....  
.....  
..... [1]

- (b) If there is sexual intercourse during ovulation, fertilisation may take place.

Describe the process of fertilisation.

.....  
.....  
..... [2]

- (c) Describe the **three** main stages of birth.

.....  
.....  
.....  
.....  
.....  
.....  
.....  
..... [6]

[Total: 10]

- 8 (a)** There is a great variation within human beings.

Name the two types of variation found within an organism that reproduces only by sexual reproduction.

1 .....

2 ..... [2]

- (b)** Some variations occur as a result of spontaneous change in genes or chromosomes.

What name is given to this spontaneous change?

..... [1]

- (c)** A large number of grey rocks form the habitat for a population of rats. The rats are the prey of snakes also living amongst the rocks. Fig. 8.1 shows how size of the rat population changes over a six months period.

**Fig. 8.1**

Describe and explain the changes in the population of the rats over the 6 months.

.....  
.....  
.....  
..... [4]

- (d)** Farmers usually breed their cattle using a selected large bull which is resistant to diseases.

Name this type of selection.

..... [1]

**[Total: 8]**
