¹The private coverage category includes plans obtained through an employer, purchased directly, or purchased through the Health Insurance Marketplace or a state-based exchange. The category excludes plans that paid for only one type of specialized service, such as accidents or dental care. Private health insurance includes managed care, such as health maintenance organizations (HMOs).

²The Medicaid coverage category includes adults who had Medicaid or other state-sponsored health plans.

³Adults not covered by private insurance, Medicaid, state-sponsored or other government-sponsored health plans (starting in 1997), Medicare, or military plans are considered to have no health insurance coverage. Adults with only Indian Health Service coverage are considered to have no health insurance coverage.

⁴Preliminary data based on the National Health Interview Survey's Early Release program. Estimates based on the preliminary file may differ from estimates based on the final annual file and have larger standard errors associated with them than standard errors based on a final annual file.
