

**Figure B5: Participants characteristics**

The screenshot shows a Microsoft Excel spreadsheet titled "DraftAbstractionForm-StudyAndParticipants-December-17 corrected [Compatibility Mode] - Microsoft Excel". The spreadsheet is set to "Creatinine-SD" and is currently on the "ParticipantsCharacteristics" sheet. The table structure is as follows:

1	Race														
2	Author, Year,Refid	Arm	Arm name (as described in the paper)	Number at baseline	Women, n	Women, (%)	Mean Age, years	Median Age, years	Range Age, years	SD Age, years	White, n	White, (%)	African-American, n	African-American, (%)	Asian, n

**Figure B5: Participants characteristics continued**

The screenshot shows a Microsoft Excel spreadsheet with the following structure:

- Title Bar:** DraftAbstractionForm-StudyAndParticipants-December-17 corrected [Compatibility Mode] - Microsoft Excel
- Formulas Bar:** Creatinine-SD
- Columns (A-AB):**
  - A: Author, Year, Refid
  - Q: Other, n
  - R: Other, (%)
  - S: BMI(kg/m2), mean
  - T: BMI, median
  - U: BMI, range
  - V: Current smoker, n
  - W: Current smoker (%)
  - X: Hypertension, n
  - Y: Hypertension, (%)
  - Z: Diabetes mellitus, n
  - AA: Diabetes mellitus, (%)
  - AB: Cardiovasc disease, n
- Rows:** Rows 1 through 22 are visible. Row 2 contains the column headers, and rows 3-22 are currently empty.
- Taskbar:** Shows several open applications including Windows Explorer, Outlook, Firefox, and Microsoft Word.
