Open image in default image viewer

Image type Gradable retinal image

Laterality Right eye

Position Disc centred image

Diabetic Retinopathy Absent

Background Retinopathy Absent Present

Microaneurysm(s)

Venous loop

Any exudate in the presence of other features of DR

Any number of cotton wool spots (CWS) in the presence of other features of DR

Haemorrhages

DESP retinal haemorrhage(s)

EDTRS retinal haemorrhage(s)

Pre-proliferative retinopathy Absent Present

Venous beading

Venous reduplication

Multiple blot haemorrhages

IRMA

Proliferative retinopathy Absent Present

Pre-retinal fibrosis and peripheiral retinal scatter laser

Fibrous proliferation(disc or elsewhere) and peripheral retinal scatter laser

Pre-proliferative features (from featured based grading) and peripheral retinal scatter laser

Background retinopathy features (from featured based grading) and peripheral retinal scatter laser

New vessels on disc

New vessels elsewhere

Pre retinal vitreous haemorrhage

Pre-retinal fibrosis

Tractional retinal detachment

Diabetic Maculopathy Absent Present

Any microaneurysm or haemorrhage within 1 DD or the centre of the fovea

Exudate within 1 DD of the centre of the fovea

Group of exudates within the macula (see guidance and photographic standard provided)

Photo coagulation

Focal/ grid laser treatment to macula

Peripheral laser treatment Absent

Other Characteristics Absent Present

Non diabetic retinal abnormalities

Drusen

Late AMD

Asteroid hyalosis

Retinal vein occlusion

Disciform scar

Myopic degeneration

Retinal vascular occlusion

Other pathology
