	STUDY RESULTS	
Results statements will typically, but not always, be presented within the "results" section of a report.		

Results statements will typically, but not always, be presented within the "results" section of a report. Results statements do not include raw data, study methods, external data, and researchers' conclusions and implications. Result statements from the eligible articles relevant to the research question will be captured for analysis using NVivo qualitative data analysis software (QSR International Pty Ltd. Version 11, 2015).⁴³
