

This report is based on research conducted by the Kaiser Permanente Research Affiliates Evidence-based Practice Center (EPC) under contract to the Agency for Healthcare Research and Quality (AHRQ), Rockville, MD (Contract No. HHS-290-2015-00007-I, Task Order No. 3). The findings and conclusions in this document are those of the authors, who are responsible for its contents, and do not necessarily represent the views of AHRQ. Therefore, no statement in this report should be construed as an official position of AHRQ or of the U.S. Department of Health and Human Services.

The information in this report is intended to help health care decision makers—patients and clinicians, health system leaders, and policymakers, among others—make well-informed decisions and thereby improve the quality of health care services. This report is not intended to be a substitute for the application of clinical judgment. Anyone who makes decisions concerning the provision of clinical care should consider this report in the same way as any medical reference and in conjunction with all other pertinent information (i.e., in the context of available resources and circumstances presented by individual patients).

This report may be used, in whole or in part, as the basis for development of clinical practice guidelines and other quality enhancement tools, or as a basis for reimbursement and coverage policies. AHRQ or U.S. Department of Health and Human Services endorsement of such derivative products may not be stated or implied.

Acknowledgments

The authors gratefully acknowledge the following individuals for their contributions to this project: Ernest Sullivent, MD, MPH, and Iris Mabry-Hernandez, MD, at AHRQ; current and former members of the U.S. Preventive Services Task Force who contributed to topic deliberations; Frank Lederle, MD, former director at the Minneapolis Veterans Affairs Center for Epidemiological and Clinical Research for his longstanding support and expertise in this field; and Shannon Robalino, MS, Smyth Lai, MLS, and Katherine Essick, BS, at the Kaiser Permanente Center for Health Research for technical and editorial assistance.
