

## Telaprevir

Revised: December 3, 2018.

CASRN: 402957-28-2

## Drug Levels and Effects

### Summary of Use during Lactation

Telaprevir is not marketed in the United States and has not been studied in nursing mothers. Because it must be used with ribavirin and peginterferon alfa, it is not considered a good choice during breastfeeding. When it was marketed, the manufacturer recommended that mothers taking telaprevir not breastfeed their infants.

### Drug Levels
