

Paromomycin

Revised: December 3, 2018.

CASRN: 7542-37-2

Drug Levels and Effects

Summary of Use during Lactation

No information is available on the clinical use of paromomycin during breastfeeding. Because paromomycin is poorly absorbed orally, it is not likely to reach the bloodstream of the infant or cause any adverse effects in breastfed infants.[1]

Drug Levels

Maternal Levels. Relevant published information was not found as of the revision date.

Infant Levels. Relevant published information was not found as of the revision date.

Effects in Breastfed Infants

Relevant published information was not found as of the revision date.

Effects on Lactation and Breastmilk

Relevant published information was not found as of the revision date.
