

Ceritinib

Revised: December 3, 2018.

CASRN: 1032900-25-6

Drug Levels and Effects

Summary of Use during Lactation

No information is available on the clinical use of ceritinib during breastfeeding. Because ceritinib is 97% bound to plasma proteins, the amount in milk is likely to be low. The manufacturer recommends that breastfeeding be discontinued during ceritinib therapy and for 2 weeks after the final dose.

Drug Levels

Maternal Levels. Relevant published information was not found as of the revision date.
