

## Axitinib

Revised: December 3, 2018.

CASRN: 319460-85-0

## Drug Levels and Effects

### Summary of Use during Lactation

No information is available on the clinical use of axitinib during breastfeeding. Because axitinib is more than 99% bound to plasma proteins, the amount in milk is likely to be low. The manufacturer recommends that breastfeeding be discontinued during axitinib therapy and for 2 weeks after the final dose of therapy.

### Drug Levels

*Maternal Levels.* Relevant published information was not found as of the revision date.

*Infant Levels.* Relevant published information was not found as of the revision date.

## Effects in Breastfed Infants

Relevant published information was not found as of the revision date.

## Effects on Lactation and Breastmilk

Relevant published information was not found as of the revision date.

## Substance Identification

### Substance Name

Axitinib

### CAS Registry Number

319460-85-0

### Drug Class

Breast Feeding

Lactation

Antineoplastic Agents

Enzyme Inhibitors

Protein Kinase Inhibitors

Signal Transduction Inhibitors

Tyrosine Kinase Inhibitors
