

## Pioglitazone

Revised: February 7, 2019.

CASRN: 111025-46-8

## Drug Levels and Effects

### Summary of Use during Lactation

No information is available on the clinical use of pioglitazone during breastfeeding. Pioglitazone is over 99% protein bound in plasma, so it is unlikely to pass into breastmilk in clinically important amounts. However, an alternate drug may be preferred, especially while nursing a newborn or preterm infant.

### Drug Levels

*Maternal Levels.* Relevant published information was not found as of the revision date.

*Infant Levels.* Relevant published information was not found as of the revision date.

## Effects in Breastfed Infants

Relevant published information was not found as of the revision date.

## Effects on Lactation and Breastmilk

Relevant published information was not found as of the revision date.

## Alternate Drugs to Consider
