# Miglitol

Revised: October 31, 2018.

CASRN: 72432-03-2

# **Drug Levels and Effects**

### Summary of Use during Lactation

Limited data indicate that miglitol is poorly excreted into breastmilk. Because miglitol is also poorly absorbed orally, it is unlikely to adversely affect the breastfed infant.

### **Drug Levels**

*Maternal Levels*. No published information was found as of the revision date. According to the manufacturer, 0.02% of a 100 mg oral dose or 0.2% of the weight-adjusted maternal dosage is excreted into breastmilk.

Infant Levels. Relevant published information was not found as of the revision date.
