

Gemfibrozil

Revised: October 31, 2018.

CASRN: 25812-30-0

Drug Levels and Effects

Summary of Use during Lactation

No relevant published information exists on the use of gemfibrozil during breastfeeding. Because of a concern with disruption of infant lipid metabolism, gemfibrozil is best avoided during breastfeeding. An alternate drug is preferred, especially while nursing a newborn or preterm infant.

Drug Levels

Maternal Levels. Relevant published information was not found as of the revision date.

Infant Levels. Relevant published information was not found as of the revision date.

Effects in Breastfed Infants

Relevant published information was not found as of the revision date.
