

Cromolyn

Revised: October 31, 2018.

CASRN: 15826-37-6

Drug Levels and Effects

Summary of Use during Lactation

Although no published data exist on the use of cromolyn during lactation, maternal milk levels are likely to be very low and it is expected to be poorly absorbed from the infant's gastrointestinal tract. An expert panel considers use of cromolyn to be acceptable during breastfeeding.[1]

Drug Levels

Maternal Levels. Relevant published information was not found as of the revision date.

Infant Levels. Relevant published information was not found as of the revision date.

Effects in Breastfed Infants

Relevant published information was not found as of the revision date.

Effects on Lactation and Breastmilk

Relevant published information was not found as of the revision date.
