Mangafodipir

Revised: October 31, 2018.

CASRN: 155319-91-8

Drug Levels and Effects

Summary of Use during Lactation

Mangafodipir is a chelate of manganese that releases free manganese ions into the bloodstream after it is metabolized. Because there is no published experience with mangafodipir during breastfeeding, other agents may be preferred, especially while nursing a newborn or preterm infant.
