Naratriptan

Revised: February 17, 2020.

CASRN: 121679-13-8

Drug Levels and Effects

Summary of Use during Lactation

Because there is little published experience with naratriptan during breastfeeding, other agents may be preferred, especially while nursing a newborn or preterm infant.

Drug Levels

Maternal Levels. One woman who was over 1 month postpartum using naratriptan to treat migraine provided milk samples at intervals over a 24-hour period after a single dose. The authors estimated the weight-adjusted infant dosage to be 5%.[1]

Infant Levels. Relevant published information was not found as of the revision date.
