* Low precision; no estimate reported.

PUF = public use file, which refers to estimates produced from a NSDUH public use file (a PUF is a NSDUH restricted-use file that has undergone statistical disclosure limitation treatment); RUF = restricted-use file, which refers to estimates produced from a NSDUH RUF and published in NSDUH's detailed tables available at http://www.samhsa.gov/data/; SE = standard error that is associated with the estimate.

NOTE: Some 2007 RUF estimates and SEs may differ from previously published estimates due to updates (see Section B.3 in Appendix B of the *Results from the 2011 National Survey on Drug Use and Health: National Findings*).
NOTE: *Ratio of estimates = PUF estimate ÷ RUF estimate*; *Ratio of SEs = PUF SE ÷ RUF SE*.
NOTE: Respondents could indicate multiple sources from which they obtained pain relievers for past month nonmedical use; thus, these response categories are not mutually exclusive.

[1] Respondents with unknown data on Source for Past Month Nonmedical Use and respondents with unknown or invalid responses to the corresponding other-specify questions were excluded from the analysis.
