* Low precision; no estimate reported.

PUF = public use file, which refers to estimates produced from a NSDUH public use file (a PUF is a NSDUH restricted-use file that has undergone statistical disclosure limitation treatment); RUF = restricted-use file, which refers to estimates produced from a NSDUH RUF and published in NSDUH's mental health detailed tables available at <http://www.samhsa.gov/data/>; SE = standard error that is associated with the estimate; VA = U.S. Department of Veteran Affairs.

NOTE: Some 2010 RUF estimates and SEs may differ from previously published estimates due to updates (see Section B.3 in Appendix B of the *Results from the 2011 National Survey on Drug Use and Health: Mental Health Findings*).

NOTE: $Ratio\ of\ estimates = PUF\ estimate \div RUF\ estimate$; $Ratio\ of\ SEs = PUF\ SE \div RUF\ SE$.

NOTE: Outpatient Mental Health Treatment/Counseling is defined as having received outpatient care for problems with emotions, nerves, or mental health. Respondents were not to include treatment for drug or alcohol use. Respondents with unknown treatment/counseling information were excluded. Estimates were based only on responses to items in the Adult Mental Health Service Utilization module.

¹ Respondents could indicate multiple sources of payment; thus, these response categories are not mutually exclusive.
